# About the Programme

---

This Certified Cloud Security Professional (CCSP) training course is the leading certification by the International Information System Security Certification Consortium, or (ISC)2. This course will enable you to negate security threats to your cloud storage by understanding information security risks and implementing strategies to maintain data security

# Key Features

---

Industry-recognized course completion certificate

7 real-world case studies

24\*7 learning assistance throughout the programme

42 hours of blended learning:

- 36 hours for Live Virtual Classes
- 6 hours of Online Video Content

# Prerequisites

---

To obtain the CCSP certification course, you must have:

- At least five years of working experience in IT, including three years of information security and one year of cloud security experience
- Those without the required experience can take the exam to become an Associate of (ISC)2 while working toward the experience needed for full certification

# Who Should Enroll in this Programme?

---

This online CCSP certification course is ideal for anyone wishing to learn and explore career opportunities in IT network security and cloud computing. This course also is ideal for enterprise architects, security administrators, systems engineers, security architects, security consultants, security engineers, security managers, and system architects.

# Certified Information Security Manager

---

## Key Learning Objectives

Upon completion of this CCSP course, you will understand:

- Fundamental cloud concepts, architecture, and design
- Cloud data security concepts such as data lifecycle and storage architectures
- The design principles of secure cloud computing
- How to plan for disaster recovery and business continuity
- The process of configuring VM tools
- How to perform risk analysis, mitigation, and management
- The theory and practice of legal risk and cloud compliance

# Course Curriculum

- Lesson 01 - Cloud Concepts, Architecture, and Design
- Lesson 02 - Cloud Data Security
- Lesson 03 - Cloud Platform and Infrastructure Security
- Lesson 04 - Cloud Application Security
- Lesson 05 - Cloud Security Operations
- Lesson 06 - Legal Risk and Compliance

# Classroom-Level Immersion: Delivered Digitally

# Features of Corporate Training:

---

Tailored learning solutions

Flexible pricing options

Enterprise-grade learning management system (LMS)

Enterprise dashboards for individuals and teams

24X7 learner assistance and support

## About Us

Deviare is a leader in digital skills training, focused on the emerging technologies that are transforming Africa. Our blended learning approach drives learner engagement. Partnering with professionals and companies, we identify their unique needs and provide outcome-centric solutions to help them achieve their professional goals.
