

A man with short, curly hair, wearing a white long-sleeved shirt and a dark grey vest, is leaning over a desk. He is looking down at a laptop. On the desk, there is a smartphone, a white coffee cup with a latte on a saucer, and a laptop. The background shows a window with a grid pattern, suggesting an office or business environment. There are blue geometric shapes overlaid on the image: a large blue triangle in the top left and a large blue trapezoid in the bottom right.

# About the Programme

---

CISA® course is aligned with the latest edition of the CISA exam and ensures that you ace the exam on your first attempt. Most jobs in this field either require or prefer that candidates have a CISA (Certified Information Systems Auditor) certification. The CISA training course will enhance your understanding of IS audit processes and also help you understand how to protect information systems.

# Key Features

---

Five simulation exams

Five domain-wise test papers

10 industry-based  
case studies

69 hours of blended learning:

- 29 hours of Online self-paced learning
- 40 hours of instructor-led training

# Prerequisites

---

To get your CISA certification, you need to:

- Submit the completed application within five years from the date of initially passing the examination
- Get all the experience you've listed verified by your employers. The experience should have been gained within the 10-year period preceding the date of application or within five years of passing the examination

# Who Should Enroll in this Programme?

---

The CompTIA Security+ 601 course is ideal for professionals who are working in the roles of IS/IT auditors/consultants, IT compliance managers, chief compliance officers, Chief risk and privacy officers, Security heads/directors and Security managers/architects.

# Certified Information Security Auditor

---

CISA (Certified Information Systems Auditor) is a certification course for professionals who want to learn how to audit, control, monitor, and assess information systems. The course covers five domains of information systems auditing: process, governance, acquisition, operations, and protection.

## Key Learning Objectives

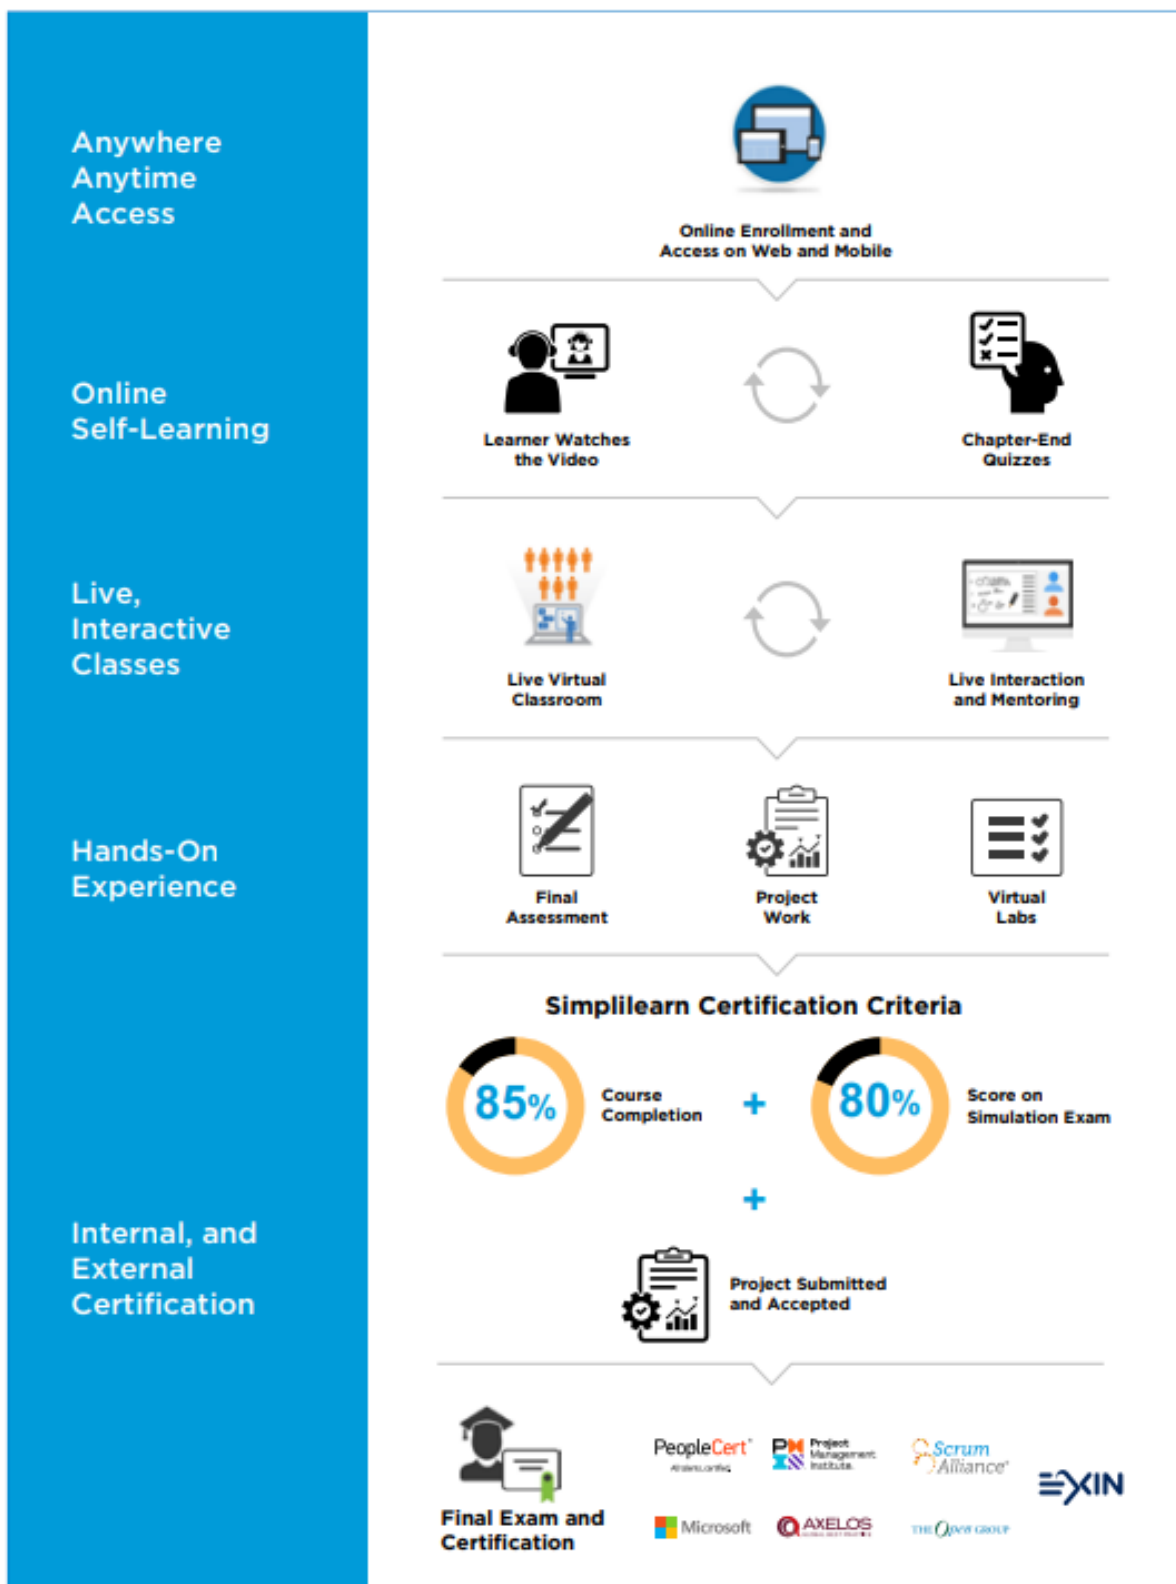

By the end of this online Certified Information Security Manager (CISM®) training course, you will have full, working knowledge of

- Be able to identify and assess vulnerabilities and report on compliance and institutional controls
- Gain a better understanding of IS audit and assurance guidelines, standards, and best practices
- Learn how to govern and control enterprise IT environments
- Understand the acquisition, development, testing, and implementation of information systems
- Develop a working knowledge of the five domains of CISA, as prescribed by ISACA
- Acquire the relevant knowledge and skills required to pass the CISA certification exam by ISACA

# Course Curriculum

- Domain 01 - Process of Auditing Information Systems
- Domain 02 - Governance and Management of IT
- Domain 03 - Information Systems Acquisition, Development, and Implementation
