Course Curriculum

About the Programme

CISSP certification training develops your expertise in defining IT architecture and designing, building, and maintaining a secure business environment using globally approved information security standards. This course covers industry best practices and prepares you for the CISSP certification exam held by (ISC).

Key Features

Offers the requisite 30 CPEs for taking the CISSP examination

Five simulation test papers to prepare you for CISSP certification

67 hours of blended learning:

- 35 hours of online self-paced learning
- 48 hours of instructor led training

Prerequisites

Candidates must have a minimum of five years cumulative paid work experience in two or more of the eight domains of the CISSP CBK. Earning a four year college degree or regional equivalent or an additional credential from the (ISC)2 approved list will satisfy one year of the required experience. Education credit will only satisfy one year of experience.

A candidate that doesn't have the required experience to become a CISSP may become an Associate of (ISC)2 by successfully passing the CISSP examination. The Associate of (ISC)2 will then have six years to earn the five years required experience

Who Should Enroll in this Programme?

The CISSP course is ideal for professionals who are working in the roles of Chief Information Security Officer, Chief Information Officer, Network Architect, Security Systems Engineer, Security heads/directors and IT Director/Manager.

Certified Information Security Auditor
