About the Programme

CompTIA Security+ 601 is a globally trusted certification that validates foundational, vendor-neutral IT security knowledge and skills. As a benchmark for best practices in IT security, this certification training covers the essential principles of network security and risk management.

Key Features

Industry-recognized course completion certificate

Covers 6 domains required to become an IT security professional

32 hours of instructor-led learning

Hands-on based learning

Prerequisites

There are no specific prerequisites to take up this certification but it is recommended that individuals take the Network+ certification before taking the CompTIA Security+ 601 training and certification exam

Who Should Enroll in this Programme?

The CompTIA Security+ 601 course is ideal for professionals who are working in the roles of system administrators, network administrators, security administrators, and IT auditors.

Certified Information Security Manager

CISM (Certified Information Security Manager) is a certification course for professionals who want to learn how to manage, design, oversee, and assess enterprise information security. The course covers four domains of information security: governance, risk management, program development and management, and incident management. The course also prepares you for the CISM exam and provides you with a lifetime access to self-paced learning and a course completion certificate.

Key Learning Objectives

By the end of this online Certified Information Security Manager (CISM®) training course, you will have full, working knowledge of

- Assess the security posture of an enterprise environment and recommend and implement appropriate security solutions
- Monitor and secure hybrid environments, including cloud, mobile, and IoT
- Operate with an awareness of applicable laws and policies, including principles of governance, risk, and compliance
- Identify, analyze, and respond to security events and incidents

Course Curriculum

- Lesson 01 - Attacks, Threats, and Vulnerabilities
- Lesson 02 - Architecture and Design
- Lesson 03 - Implementation
- Lesson 04 - Operations and Incident Response
- Lesson 05 - Governance, Risk, and Compliance
